

This is an Important notice for Fly Egypt customers coming to Egypt regarding updating the health controls, requirements and procedures established at entry points related to vaccination against the Corona virus.

With reference to the instructions issued by the competent authorities of the Egyptian Ministry of Health and Population, Fly Egypt informs its incoming customers with certificates of vaccination against the Corona virus, as follows: -

### **Arriving passengers with certificates of vaccination against the Corona virus**

**Passengers arriving with corona virus vaccination certificates from countries not affected by mutated strains of corona virus**, directly or indirectly, during the previous 14 days:

- The vaccination certificate in the passenger's possession against the Corona virus is reviewed and the certificates approved in the country (issuing authority) are accepted without abrasion, cross-out or addition and containing a QR Code, and these certificates are accepted after verifying the authority issuing the certificate.
- Vaccines that have been approved by the World Health Organization and the Egyptian Medicines Authority are approved, provided that the time period is taken into account by the passage of 14 days from receiving the second dose of vaccines given in two doses (Pfizer, AstraZeneca, Moderna, Sinopharma, Sinovac or Sputnik) or 14 The day after receiving the first dose of the Johnson & Johnson vaccine.

### **Passengers arriving without certificates of vaccination against the Corona virus**

Follow the health controls, requirements and procedures in force in this regard in light of the decisions of the Prime Minister and the relevant periodical publications.
